

If you are typing in French and want to use a letter which has an accent, this is how to do it...

You will need to use the "alt" key and the numeric keypad.

Press the "alt" key and do not let it go. Type in the codes, using the numeric key-pad. When you have typed in the correct code, let the "alt" key go and the letter with the accent will appear "as if by magic".

The codes are as follows:

à	133
â	131
ç	135
Ç	128
é	130
è	138
ê	136
ë	137
